

Baume Capillaire

Restores shine and facilitates reconditioning of damaged, dull or coarse Hair Instants®

Damaged, dull or coarse Hair Instants®

When the hair has split ends it means that the hair fibre is damaged. The cuticle – the outer layer containing the most keratin – is becoming weaker. The keratin fibrils contained in the hair cortex start to stand up and curl up at the ends.

In fact, the cuticles allow the hair to preserve its water balance and give it elasticity, strength and shine. Its smooth, impermeable cells, which are arranged in overlapping layers, protect the cortex from drying out and combat external aggression.

The causes of cuticle damage are manifold: excessive exposure to the sun, damaging brushing or drying, pollution and chemical treatments (hair dyes and perms, etc.).

Biologique Recherche's response:

Biologique Recherche has created Baume Capillaire to off-set the problems of brittle, damaged hair. It has been formulated specifically to strengthen and protect the cuticle and to ensure a lasting reduction in the signs relating to the drying out of the hair. It facilitates reconditioning, leaving the hair supple and glossy at the same time.

treatment stage

Silicone-free reconditioning to prepare, repair and smooth

Baume Capillaire from Biologique Recherche, which contains extracts of repairing, protecting agents, restores shine to the hair and facilitates reconditioning. A conditioning product, it repairs the layers of cuticles, smoothes them, coats the hair and deposits a continuous film on the surface to combat external aggression.

Actions:

- Repairs and smoothes layers of cuticles
- Coats and protects the hair
- Facilitates reconditioning

Results:

- Shiny, supple and softer hair

Protective Active Ingredients: Wasabi Extract and Tomato Extract.

Moisturizing Active Ingredient: Silk Extract.

Smoothing Active Ingredients that Radiate Shine: Jicama Extract, Broccoli Oil and Lemon Extract.

Directions for use:

After using the recommended shampoo, apply a dab of Baume Capillaire all over hair lengths. Leave on for 5 to 10 minutes for an optimal penetration of active ingredients. Proceed with disentangling and then rinse abundantly.

Versions:

Retail version: 200 ml tube
Professional version: 500 ml jar
