

The skin dehydrates easily when exposed to the sun, in the summer months or in hot countries, since the water which constitutes most of the dermis evaporates more quickly.

This is why Biologique Recherche has created Huile Bénédique whose rich protecting and anti-dehydrating ingredients enhance the skin's beauty and leave it delicately scented.

Huile Bénédique

Huile sèche avant et après soleil
Before and after sun dry oil

Biologique Recherche's Huile Bénédique contains a treasure trove of botanical oils as well as flower and plant macerates.

Botanical oils like Sesame Seed and Coconut Oil help maintain the epidermis and prevent dehydration. Sunflower Seed and Apricot Kernel Oil nourish the skin, maintain moisture levels and restore suppleness.

Flower macerates like: Frangipani and Tiare Flower Extracts restore the skin's silky softness. Plant macerates which are rich in Carotenoids, including Carrot, Tomato and Annatto Extracts help accelerate, deepen and unify the suntan.

Huile Bénédique's non-greasy formula provides a protective film and leaves the skin radiantly healthy.

Result: enhances your tan and leaves your skin silky soft and glowing.

Formulation and active ingredients:

Active ingredients: Sesame Seed Oil, Coconut Oil, Sunflower Seed Oil, Apricot Kernel Oil, Frangipani Extract, Rosemary Extract, Tomato Extract, Annatto Extract, Carrot Extract, Tiare Flower Extract.

The Botanical oils

The botanical oils are obtained by the cold pressing of perfectly ripe seeds, fruit and plants so that the active ingredients retain all their rich properties.

Botanical oils contribute vitamins, proteins and minerals which protect, soften and repair the skin's hydrolipidic film and also prevent dehydration, restoring the skin's own natural defense barrier.

Flower and plant macerates

The oily active ingredients are obtained from oil macerates, a procedure whereby plants are covered with vegetable oils. The power of the vegetable oils ensures that the active ingredients in the plants are not damaged.

The Huile Bénéfique formula comprises a balanced combination of botanical oils and oily active ingredients.

1. Nourishing, regenerating and soothing ingredients

- Coconut Oil:

Coconut Oil is remarkably rich in Fatty Acids which regenerate and smooth the skin. Its moisturizing and softening properties are particularly beneficial for parts of the body where the skin is fine and sensitive.

- Sunflower Seed Oil:

Sunflower Seed Oil is renowned for its nourishing and softening qualities and is rich in Essential Fatty Acids (omega 6) and Vitamins E and F. It also contains Lecithin, Carotenoids and Tocopherols, which make the skin smooth and supple.

- Apricot Kernel Oil:

Apricot Kernel Oil, which is rich in Vitamins A and B, nourishes, regenerates and softens the skin.

- Frangipani Extract:

Frangipani Flowers are known for their softening, moisturizing and purifying virtues. They also have antiseptic properties.

- Tiare Flower Extract:

Tiare Flowers exude a powerful sweet scent and secrete a soothing essential oil.

2. Antioxidant and protecting agents

- Sesame Seed Oil:

Sesame Seed Oil contains two natural antioxidants, Sesamoline and Sesamine, and therefore protects the skin from the sun because it absorbs ultraviolet rays. It is rich in Essential Fatty Acids and helps maintain skin tissue integrity as well as effectively combating irritation and dehydration.

- Rosemary Extract:

Rosemary Extract has strong anti-irritant and repairing properties and is also known for its antioxidant virtues.

- Annatto Extract:

Annatto Extract has astringent and softening properties and also protects the skin from ultraviolet rays.

3. Activating agents

- Carrot Extract:

Carrot Extract is rich in Provitamin A which accelerates tanning and gives the skin a beautiful golden hue.

- Tomato Extract:

Tomato contains fibers, antioxidant vitamins and carotenoids (Vitamin A precursor, particularly Beta-Carotene) which activate the tanning process.

Tomato Extract effectively traps the free radicals produced by sunshine and also combats stress induced by exposure to the sun, reinforcing the skin's protection.

Instructions:

Recommended for all Skin Instants. Ideal for skins that are already tanned, dehydrated and delipidated. Apply daily to the whole face, body and hair.

Cautions:

- Contains no sunscreen and offers no protection against UV rays
- Always apply sunscreen before exposing skin to the sun
- Over-exposure to the sun can seriously damage the skin's health even if sunscreen is used
- Avoid contact with the eyes
- Should not be used during pregnancy
- Not suitable for children.

Actions, contains active ingredients which:

- Leave a protective film on the skin and prevent dehydration
- Preserve the skin's hydrolipidic film and natural defense barrier
- Are rich in Vitamin A and Provitamin A, and act as anti-oxidants
- Soften the upper layers of the epidermis
- Do not leave a greasy film on the skin

Results:

- Makes the skin suppler
- The skin is sublimates and relipidated
- Leaves the skin silky soft and glowing
- Hair is glossy

Available format:

- Bottle 100ml
